## Projects

- Gestion Spectacle

This is a Java-based project developed as part of the learning process at ESSECT. The project demonstrates core Java principles and practical implementation of Object-Oriented Programming (OOP) concepts in managing spectacles.

- ESSECT Website Project

This project is a modern and user-friendly website designed for ESSECT. The website showcases advanced web design principles, focusing on clean typography, a harmonious color scheme, and an intuitive layout. It was developed as a practical exercise to enhance web development and design skills.

- Chat Bot

This project is a dynamic and interactive chatbot developed as part of a school project at ESSECT. The chatbot is designed to engage users in conversations, generate motivational quotes, and respond intelligently to a variety of queries. It was developed to enhance programming and problem-solving skills.
